

Stage 2 Notes and Tips

Stage 2 can be completed online in about six to eight hours.

Tips from instructors who completed this training:

1. Try to cluster the time you spend on Stage 2, rather than spreading it out over a long period of time.
2. More intense focus such as a weekend or a PD day could be helpful.
3. Take point---form notes while viewing the movies.
4. Review a movie twice before attempting an assessment if needed.
5. Partner with another instructor to complete Stage 2.
6. Organize instructors completing Stage 2 at your work---site computer lab. (e.g. mornings, afternoons, PD Days, or on a weekend if possible.)
7. Contact your mentor via email with any questions or concerns.

Tips from the developers

8. Be aware of and read the News Forum at the top of the course. It may have information that can assist you.
9. The General Discussion Forum might be useful to read as you can learn from others' experience.
10. If there has been a delay since Stage One, it might be a good idea to review the concepts from Stage One through the PowerPoint or the Practical Review
11. During a Confidence Builder Quiz, you may not change your response after the Submit button has been pressed. You must continue the quiz and repeat if desired.
12. You must pass all Try it Yourself assessments and Confidence Builders with a score of 70% to pass Stage two.
13. It is recommended that you complete each topic (Instructional videos, Try it Yourself and a Confidence Builder) at one sitting.
14. When using the Try it Yourself simulations, be deliberate and reasonable when using the mouse. Clicking through in a reckless manner may lead to the simulation freezing up. In this case the participant must close the simulation and start over.
15. When re-attempting a quiz, check "Start a new attempt" and click "Enter".
